

Concrete Can Do That

Why Choose Concrete?

In today's residential market, home buyers have high expectations. Building with concrete offers solid, disaster resistant construction, greater comfort and security, lower energy bills, lower maintenance, as well as a home that's healthier to live in and easier on the environment.

Building with concrete systems is a responsible choice for sustainable development due to its durability, energy efficiency and versatility. Building with concrete contributes to the conservation of energy and preservation of resources – helping to protect the environment.

Members of the National Association of Home Builders' Concrete Home Building Council understand the benefits of building with concrete, while enjoying opportunities to increase their knowledge of this growing segment of the residential home building industry through many resources.

NAHB's Concrete Home Building Council Resources Include:

- Autoclaved Aerated Concrete (AAC)
- Cement
- Ready-Mixed Concrete
- Insulating Concrete Forms (ICFs)
- Masonry
- Post-Tensioning
- Precast
- Reusable Concrete Forms (RCFs)
- Pavers
- Tile Roofing

Other CHBC benefits include:

- Networking Opportunities
- Industry Promotion
