

Insulate

November 10, 2005

Louisville, KY

Building with Insulating Concrete Forms

If you're not familiar with Insulating Concrete Forms (ICFs), this course is an excellent introduction. ICFs are a popular and fast-growing new method of constructing high-performance exterior walls for a home. This full-day course covers the advantages and costs of ICF construction, the components and materials used, design and planning considerations, the logistics of ICF construction and important business and marketing considerations. Upon completion you'll have all the information you need to evaluate and start using ICFs.

As a graduate of this course, you will:

- Appreciate the benefits of ICF construction for the builder and homeowner
- Learn about the different types of ICFs and supporting products
- Learn about constructing walls, floors and roof decks with ICFs
- Be able to explain what other trades must do to integrate their work with ICF walls
- Gain tips about running your ICF business, marketing yourself as an ICF builder and additional technical and promotional resources available
